TO WHOM IT MAY CONCERN

Subject: Experience & Contribution Letter - [REDACTED] & Muhammad Muntazer Mehdi

This letter is to formally recognise the valuable contributions of [REDACTED] and **Muhammad Muntazer Mehdi** to the development and delivery of my products and businesses since 15 December 2025.

[REDACTED] has worked with me as the **Project Manager & Project Lead**, responsible for planning, coordination, and the overall delivery of every project. **Muhammad Muntazer Mehdi** has worked under [REDACTED] leadership as the **Lead Developer (Full-Stack & Mobile)**, responsible for the design and development of the products across web, mobile, and backend.

Together, they built and delivered the following projects:

- **Feenix:** Corporate website for Feenix.
- **Vidos Framework (GVRN):** A Responsible-AI governance platform, including decision records, risk and impact registers, compliance mapping, and document generation, supported by an automated test suite.
- **Vidos Learning (Responsible with AI):** A multi-tenant Responsible-AI microlearning platform featuring multi-language support, course delivery, certification, and subscription billing.
- **Roley:** A complete cross-platform mobile application together with its landing website and backend.
- **Workmate:** A complete product mobile application, backend, and website.
- **Vidos Solutions:** Corporate website for the parent company, Vidos Solutions.

Both continue to work with us and are currently engaged on **Vidos Learning (Phase 2)** along with two new products.

Throughout our engagement, [REDACTED] and Muhammad Muntazer Mehdi have consistently delivered high-quality, reliable work and demonstrated strong professionalism, ownership, and dependability. They have been valued contributors to the growth of our products, and I am happy to recommend them both without reservation.

Should you require any verification, please feel free to contact me using the details below.

Sincerely,

Micah Stennett

ANNEXURE A - PROJECT DETAILS

Delivered by [REDACTED] (Project Manager & Project Lead) and Muhammad Muntazer Mehdi (Lead Developer).

Feenix

The corporate website for the Feenix brand, built with Next.js. A modern, multi-section marketing site with a headless CMS (Sanity)–powered news and blog section, custom animations, and a search-engine and social-preview optimisation layer. Live at feenix.tech.

Vidos Framework (GVRN)

A Responsible-AI governance platform that helps organisations manage AI compliance end-to-end decision records, risk and impact registers (AI Impact Assessments), compliance mapping to governance standards, and automated generation of governance documents in Word, PDF, and Excel. Built on Next.js and Supabase with role-based access control, and backed by an extensive automated test suite (unit, integration, and end-to-end).

Vidos Learning (Responsible with AI)

A live, multi-tenant B2B microlearning platform delivering Responsible-AI training. It supports multiple client organisations, multi-language localisation (19 languages), structured course and lesson delivery, assessments and certificates, subscription and one-time payments via Stripe, and analytics dashboards all with enterprise-grade security.

Roley

A cross-platform mobile application (iOS and Android) that recommends AI tools and software stacks for businesses through an AI-powered chat experience, together with its marketing landing website. It includes a serverless backend that powers the AI recommendations, subscription billing, community features, and PDF export of results.

Workmate

An on-demand services marketplace connecting customers with local and remote service providers, delivered as a complete product a cross-platform mobile application, a backend API, and a website. Covers provider onboarding, service booking, real-time chat, and payments.

Vidos Solutions

The corporate website for the parent company, Vidos Solutions. A professional, multi-page marketing site (services, industries, and case studies) with a CMS-backed blog and a secure, hardened contact system.
